Mayank-Singh Mayanksingh1234

Summary

Enthusiastic Computer Engineering student with practical experience in Software engineer, data analyst and full-stack Web development using the MERN stack, with a strong foundation in Data Structures, Algorithms, and analytical problem-solving. Passionate about building scalable, user-focused applications and exploring modern AI tools to create efficient web solutions.

Skills

Python, C++, JavaScript, C, SQL, Node.js, Express.js, React.js, TailwindCSS, HTML5, CSS3, Redux, AWS, PostgreSQL, MongoDB, Kubernetes, Socket.IO, Redis, Data Structures & Algorithms, Software Engineering, Computer Networking, Cloud Computing, Postman, VS Code, GitHub, Git, CI/CD, Problem solving, Teamwork, Leadership, Time management, Communication Skills

Education

B.E/B.Tech in Computer Science & Engineering

Chandigarh University, Mohali, India
2021 - 2025

Higher Secondary Certificate/ Intermediate level

Kendriya Vidyalaya No 1 Ferozepur,
Punjab
2019 - 2020

Secondary School Certificate (SSC)/ Matriculation

Kendriya Vidyalaya No 1 Golconda,
Hyderabad
2017 - 2018

Work Experience

Silverock Inc

Jun 2025 - Dec 2025

MERN stack Intern

Built and maintained RESTful APIs for authentication, course management, and user dashboards, ensuring secure and efficient data flow between frontend and backend systems. Collaborated with cross-functional teams including mentors, trainers, and product leads to translate educational requirements into technical solutions aligned with real-world industry standards. Participated in code reviews, debugging, and performance optimization, improving application reliability and maintainability.

MResult

Jun 2022 - Aug 2022

Data Analyst Intern

Performed comprehensive data cleaning and exploratory data analysis, and developed regression & classification models to uncover actionable insights, identify emerging trends, and support data-driven decision-making. Collaborated on software features and automation scripts, ensuring efficient workflows and improving reporting accuracy through data visualization and analytical dashboards. Communicated findings effectively to stakeholders in MNC.

Projects

Car Booking App

2024

Built a full-stack MERN vehicle marketplace with secure authentication, real-time car availability, and efficient data handling for seamless vehicle listing, booking, buying, and selling — delivering a smooth, responsive user experience. Collaboratively managed deployment and implemented dynamic search, advanced filtering, and a fully responsive UI with Tailwind CSS to deliver fast browsing, smooth navigation, and optimized performance across all user devices.

Monkey-Type Clone

Developed a real-time typing speed test platform using React and TailwindCSS with custom logic for WPM, CPM, accuracy, and error detection via text highlighting, ensuring a smooth, interactive, and highly responsive user experience.

Barcelona Football Club Website

Built an interactive FC Barcelona platform using the MERN stack, featuring live match schedules, player profiles, real-time standings with a visually engaging UI, smooth page transitions, and responsive design for seamless user experience. Integrated real-time data updates, reusable UI components, REST and optimized API requests to deliver fast content rendering, REST APIs, and an impressive engaging fan experience across all devices with constant performance.
